# EcoVision Door Upgrade

FOR MEDIUM TEMPERATURE, MULTI-DECK CASES

Easy to save. Easy to see. Easy to install.

---

Don't settle for a retrofit... you deserve an upgrade!

## ECOVISION DOOR UPGRADE

Before

### Outstanding energy reduction.

EcoVision doors reduce refrigeration energy use by up to 84% compared to open dairy and deli cases.

- No heat required in the doors or frames, keeping energy costs low. Resulting from our advanced frame/dual pane glass pack.
- Additional refrigeration energy savings achieved by switching to LED lights versus fluorescents.
- Refrigeration load reduction on your existing systems also translates to more energy savings or more BTUs for other purposes.

After

### Excellent visibility and product accessibility.

EcoVision doors allow excellent product visibility and easy access to product displays.

- New ultra-thin door frame in the center opening enhances product visibility across all product shelves.
- Narrow 24" French-style door offers a wide opening for quick shopper access to product displays. It is easy to stock from the aisle. And maintains consistent product temperatures inside the display space.
- EcoShine II LED lights mounted on the door frame provides full and uniform product illumination and eliminates the need for shelf, rail, and canopy lights resulting in lower maintenance costs.

### Complete turnkey solutions.

Hussmann's refrigeration expertise enables our door upgrades to be a comprehensive, turnkey solution that improves the operating performance of your medium temperature, multi-deck equipment.

- Our centralized coordination is from beginning to end. And includes in-store case audits of your existing equipment, complete project quotes including parts and installation, project management of the overall upgrade schedule and additional savings from utility/energy rebates.
- As an equipment manufacturer, we will provide a complete refrigeration system optimization by a qualified application engineer to ensure that any changes to your equipment result in maximum savings to your bottom line.
- Identify energy rebate opportunities with local utility companies and then assist with submitting the proper documentation to ensure that you receive the maximum payback for your upgrade.

### KEY FEATURES.

- Hold-open, French-style door design for multi-deck dairy, packaged deli, and beverage cases.
- LED mullion lights replace canopy, rail, and shelf lighting for excellent product visibility.
- High-reliability wipers effectively minimize air penetration when doors are closed.
- MICROBAN® technology antimicrobial protection on door handles.
- Doors can be installed overnight ... without any shopper disruption or unloading of existing product displays.
- Many door heights available, including 53.5", 60", 66", and others.
- Gray and black color options available.

MICROBAN® is a registered trademark of Microban Products Company.
